PROFESSIONAL SUMMARY

Data Analyst skilled in SQL, Python, Power BI, DAX, and Advanced Excel, with hands-on experience analyzing HR and financial datasets to uncover business insights. Built end-to-end analytics projects involving data cleaning, ETL, dashboard development, and KPI reporting using datasets of up to 10,000+ records. Strong foundation in data visualization, exploratory data analysis, and translating business questions into actionable insights.

TECHNICAL SKILLS

Programming: SQL, Python (Pandas, NumPy)
Business Intelligence: Power BI, DAX, Power Query, Microsoft Fabric
Database: MySQL, ETL, Data Modeling, Data Cleaning
Analytics: EDA, KPI Reporting, Statistical Analysis, Data Validation
Tools: Advanced Excel, Git, GitHub, Microsoft Copilot

PROJECTS

HR Attrition Analytics | *Power BI, SQL, Python, Excel* Dec 2025 – Jan 2026

- Analyzed 1,470 employee records using SQL and Python, identifying a 16.12% attrition rate with 48% of resignations occurring in the lowest salary band and 42% within employees' first two years.
- Segmented employees across 32 HR attributes to identify 75 high-risk employees while revealing Sales (38.55%) and HR (35.59%) as the departments with the highest attrition rates.
- Built an interactive Power BI dashboard tracking five HR KPIs, reducing manual analysis and enabling faster identification of high-risk departments and employee segments.

Credit Card Financial Dashboard | *Power BI (DAX), MySQL, Excel* Dec 2025

- Developed an end-to-end Power BI dashboard tracking \$57M in credit card revenue and identifying 28.8% week-over-week revenue growth through automated KPI reporting.
- Built an ETL pipeline integrating 10,109 customer and transaction records into MySQL, creating a clean relational dataset for Power BI reporting.
- Created 12+ DAX measures to monitor revenue growth, activation rate (57.5%), delinquency rate (6.06%), and customer segmentation, reducing manual KPI calculations.
- Identified key revenue drivers, revealing that 68% of revenue originated from TX, NY, and CA, 40% from high-income customers, and uncovering a \$5M revenue difference by gender.

Super Store Sales Analytics | *Power BI, SQL, PySpark, Microsoft Fabric* June 2026

- Analyzed 9,994 orders across 531 cities using PySpark and SQL within Microsoft Fabric, identifying West as the top revenue region at \$0.71M and Technology as the highest-grossing category.
- Built an ETL pipeline ingesting raw retail data into a Microsoft Fabric Lakehouse with PySpark transformation and developed a Power BI dashboard tracking \$2.27M in revenue and \$285.71K in profit across four years.
- Identified that the Consumer segment contributed 50.61% of total revenue and revenue grew from \$464K (2014) to \$725K (2017), while profit growth lagged, signaling potential margin pressure.

PROFESSIONAL EXPERIENCE

Full Stack Web Development Intern July 2024 – August 2024 *Ardent Software Services Haryana, India*

- Optimized SQL queries through indexing and query refinement, improving backend data retrieval performance and application responsiveness.
- Developed normalized database structures across multiple related tables, improving data integrity and reducing duplicate records within backend systems.
- Supported SQL-based backend data pipelines by writing and optimizing queries, improving maintainability and enabling faster access to application data.

CERTIFICATIONS

Data Analytics with Generative AI – Simplilearn (2026): AI-powered data analysis, prompt engineering, and GenAI tools for analytics workflows

McKinsey Forward Program – McKinsey & Company (2025): Strategic problem-solving, structured thinking, and business analytics

Data Analytics Job Simulation – Deloitte (2025): Business analysis, data-driven consulting, and stakeholder reporting

EDUCATION

Bachelor of Technology in Information Technology Graduated: 2025 *Panipat Institute of Engineering and Technology Haryana, India*
